

HAZARDS AND THREATS

MUDSLIDES, DEBRIS MUDFLOWS, LANDSLIDES

WHAT TO DO BEFORE STORM AND HEAVY RAINFALL

- Assume that steep slopes are areas burned by wildfires are vulnerable to landslides and debris mudflows.
- Educate yourself whether landslides or debris mudflows have occurred in the past in your area by contacting local law enforcement and/or fire departments, local universities who focus on geological surveys and/or projects.
- Contact your local law enforcement and/or fire departments about emergency and evacuation plans.
- Consult a professional geotechnical expert for advice on the landslide and or corrective actions you and your loved ones can take.
- Create an emergency/disaster plans for you, your loved ones, pets, and businesses.
