

HAZARDS AND THREATS

Nuclear Power Plant (NPP) Generating Stations Introduction

The County of Los Angeles is located within the range of two Nuclear Power Plant (NPP) Generating Stations.

The first NPP is located in Diablo Canyon at Avila Beach in San Luis Obispo County and the second is San Onofre positioned near the City of San Clemente in Orange and San Diego Counties.

Both NPP Generating Stations have the following:

- Emergency Response Plans (would include contacting local, State and Federal authorities – inter-jurisdictional planning committees)
- Evacuation Zones (identified 20-mile radius of each facility)
- Ingestion Pathway Zones (50-mile radius zones have been identified to accommodate food supplies and other commodities)

The following will provide you and your loved ones with basic information about the Nuclear Power Plants that are located near Los Angeles County.
